GOOD WORDS

"I have used Ranck's for years! When a pipe broke under ground, they took great pains to find the right location where the leak was while not destroying the roots of a tree near the pipe. They maintained my heating system and put a sump pump in for me. They do an excellent job, clean up afterwards and waste no time! I highly recommend them to everyone."

PREPARING FOR A NEW SEASON. SHOULD I REPLACE MY UNIT?

Too often, people think that as long as their boiler or furnace keeps them warm that it doesn't need replaced. Certainly all of us have lots of items on our budget list, please take a minute to consider the rising energy and oil prices. And then consider looking at some affordable energy efficient alternatives to replace the aging heating system in your home. Some benefits with a new system include:

- Decreased monthly utility costs
- Improved indoor comfort
- Increased air flow throughout your entire home
